Summer Camp at Legacy Academy is a great way to spend the summer! Filled with field trips, outdoor fun, cooking, and crafts, campers will be challenged to think outside the box and use their imaginations to discover endless possibilities all summer long. Our “MASTER” program will incorporate Math, Science, Technology, and Engineering into fun-filled activities that will make this a summer to remember!

# REGISTER NOW FOR SUMMER

## Week 1 AVIATION

### Ever dreamed of flying your own plane?

We'll delve into the science and physics of flight and create paper and model airplanes so we can perform experiments involving the forces that help keep a plane in the air. We'll also create a mock cockpit!

## LOCOMOTION

### Let's get things moving!

Come explore the concepts of motion through the movement of our bodies in dance, martial arts, and sports and how our bodies are amazing locomotion machines. Our voyage will help us discover ways to maintain our healthy motors, as well as use our imagination to build new and exciting machines of the past, present, and future.

## THE FOUR SEASONS

### Sun, rain, wind, & snow!

During Week 3, campers will create weather modules and play sports from every season. We'll learn how science, technology, engineering, and mathematics impact everything we do all year long.

## Week 2

Week

## 5

## "A MINUTE TO WIN IT"

### Think fast!

Campers will have a "minute to win it" in Legacy Academy's 60-second Summer Camp challenges that will have campers moving quickly and thinking on their feet. They will work together as a team to finish first and win in dozens of fun science, technology, and math-based games.

## ROBOTICS

### Inspire your inner engineer!

Campers will use various recycled resources to create and make a 3-D Robot. They also will design, name and market their final product to a "Shark Tank" group.

Week

## 4

# SUMMER CAMP AT LEGACY!

Week 6

## IMAGINATION EXPERIENCE

**New ideas start here!** Our "Imagination Experience" is designed to stretch the imagination of our campers. Enjoy hands-on activities that explore the way new ideas and inventions come about. We'll make self-watering planters for starting seeds, build bottle terrariums, and create garden ornaments.

## IMAGINATION INVENTIONS

Week 7

### Think outside the box!

Creativity starts with the confidence to try new things, so we'll encourage students to create their own inventions! "I think I Can, I think I Can, I think I Can, I Know I Can!"

## BUILD & PLAY

Week 8

### Up to the challenge!

Nothing can stop us as we construct and complete obstacle courses that challenge our minds and bodies and help us learn to work as a team. We'll also explore "kitchen alchemy," the way ingredients combine to create delicious foods that can build our health and strengthen our bodies.

## THE ULTIMATE HABITAT

Week 9

### Keeping it green.

This week campers will have exciting adventures learning about planet Earth's "ultimate habitats". Campers will learn about the environment's ecosystem, energy flow, different types of organisms; and environments and how we can protect the Earth. We will also design and create our own biodomes using items collected from a nature trail field trip.

## SOLAR SYSTEM

Week 10

**Blast off into the vastness of the solar system.** Campers will explore the sun and moon and stars. We'll also learn about black holes and mysteries that keep astronomers and physicists thinking. We'll learn about planets and explore what it would take to create an environment where astronauts could live.
